ENCLOSURES .....

.....

.....

SPARE COPIES.....

The sale notifications relating to the major fuel coupes in the several Panchayat Forests of this District are published in the form prescribed in Appendix VIII of B.S.O. 195 A and the agreements from the successful bidders obtained in the form prescribed in Appendix IX. Para 11 of Appendix VIII draws the special attention of the intending bidders to condition 12 of the agreement which requires the contractor to put up a fence round the coupe leased out to him.

2. The Tahsildar Harpanahalli brings to my notice that the fuel coupes in Hyarada forest of his taluk are very small containing thin tree growth and that the cost of fencing exceeds the highest bid which is generally about Rs.50/-. In other forests the bid is generally about Rs.100/- and fencing is costly and not effective in preventing cattle from trespass. He therefore suggests that the process of "dumping" may be adopted in lieu of "fencing" as recommended by the District Forest Officer, Anantapur, whose views on "fencing" and "dumping" are embodied in para 6 of his letter Ref. G.5 No. 2765/29 dated 12th December 1929, an extract of which is enclosed for reference.

3. Dumping is merely to dispose of the waste product to the best advantage. Using it for fencing does not keep cattle out for long and insisting on this use is likely to prevent any coupes being sold. In both Kudligi and

Harpanahalli Taluks there is hardly any demand for this fuel and sales of major fuel coupes are usually abortive. The regeneration of the tree growth is easy because of the good rainfall, so the danger from brousing low trees is small. I agree with the Tahsildar and request that the Board will be pleased to authorise me to substitute where necessary the process of "dumping" in place of "fencing" in respect of all coupes sold or to be sold in this District. As the suggestion is one which involves a departure from B.S.O. 195 - A - 10 - e and some modifications in the standard form of the sale notification and of the agreement I have submitted the matter for the orders of the Board.

For Collector.

s.u.c./25.9.

Extract of para 6 of Anantapur District Forest Officer's letter No. G-5 - 2765/29 dated 12.12.29 to the Collector of Bellary.

No fencing round the coupe under working seems to be necessary. The fencing is generally costly and cannot effectively prevent cattle from tresspass in the felled area. Further it does not generally stand for more than 2 seasons. So, fencing may be substituted by what is called "dumping". All the twigs and branchwood in the coupe under working which have no sale may be collected and heaped in the blocks in the coupe here and there. This process is called "dumping". The heaps should be atleast 4 feet high, length and width varying with the size of blanks. These heaps should be burnt in November. In the ashes in the burnt patches, seeds of timber species particularly Teak which is said to grow in the locality which are useful for agricultural implements may be dibbled in the following April. Dumping and burning is an effective measure minimising the effect of fire in the young coupe and dibbling would encourage regeneration in the blanks.

Panchayats - Funds - (Bellary) -
Major fuel coupes - "Dumping"
process in place of fencing - Proposal

pp1-2 c.f. L1684

To Assistant Secretary.

Please see letter from the Collr.
of Bellary at pp1-2 c.f.

2/. For orders whether the Collr's
proposal to substitute the process
of "dumping" for "fencing" where
necessary in respect of the coupes
in the Bellary Dt. may be accepted.
As the case is peculiar to Bellary
alone, no G.O. amendments to
G.O.C. seems necessary.

26/10/33

5-X-33

As the proposal has the approval of a D. F.O. it may be accepted so far as this Govt is concerned.
